### RS-232 PINOUT

	RS-232 PINOUT
1	DCD
2	Rx
3	Tx
4	DTR
5	Ground
6	DSR
7	RTS
8	CTS
9	RI

## HARDWARE SETUP

1. Unbox the device and gather the required accessories.
2. Optional: Install the DIN rail clip to the base of the device.
3. Connect the USB Type-C cable to the device, and connect the other end to the USB port of a computer. Alternatively, connect a RS-232 DB9 serial cable to the RS-232 serial port. (RS-232 DB9 cable not provided.)
4. Push the pin next to the SIM tray to eject the tray. Place the SIM card in the tray with the contact side facing up. Push the tray in to lock it in place.
5. Attach the cellular SMA antenna to the SMA connector by rotating it in a clockwise direction.
6. Connect the 4-pin connector of the power adapter to the DC input port to power on the device.

Cellular Modem

## COMMUNICATING WITH THE MODEM

1. Open a terminal program (e.g. Tera Term) installed on your computer.
  2. Configure the serial settings as shown below:
    - Baud rate: 115,200 mbps
    - Data bits: 8
    - Parity: None
    - Stop Bits: 1
    - Flow Control: Hardware
  3. Enable Local echo for the terminal to view the commands that you type.
  4. Execute the following command to enable cellular AT commands on the USB port:  
  
`AT#USBATCOM=1`
- For instructions to use AT commands to test communication with the device refer to *M110 Series User Guide* .
