Product Discontinuation Notice

September 14, 2017

Dear Valued Customer / Partner:

Transition Networks would like to inform you of our plans to discontinue the ION Dry Contact Relay module (IONDCR) from the ION product line. This module is used in the now discontinued IONPS-A power supply to interface with an external alarm system utilizing either visual or audible indicators. Listed below are the discontinued product model number and a description.

<u>Discontinued P/N</u>	<u>Description:</u>
IONDCR	A dry contact relay module for use in the ION AC power supply, IONPS-A

Alternative Product

A direct replacement product will not be offered as the new IONPS-A-R1 does not support a dry contact relay module. However the IONDCR-R1 will still be available to support the ION DC power supply, IONPS-D.

Last Order Date

Orders will be accepted for the discontinued product through October 31, 2017 or while supplies last.

Closing

We look forward to new opportunities to support your networking requirements with our comprehensive product line. Should you have any questions, please contact your sales representative.

Sincerely,
Transition Networks Management Team
