## Product Discontinuation Notice

September 14, 2017

Dear Valued Customer / Partner:

Transition Networks would like to inform you of our plans to discontinue the SEFE product series within the Point System product line. This product is a speed selectable copper to fiber media converter that can support either 10Base Ethernet or 100Base Ethernet. Below is a list of the discontinued product model numbers and their descriptions.

<b><u>Discontinued P/N</u></b>	<b><u>Description:</u></b>
CSEFE1014-100	Point System Converter Card, 10Base-T or 1000Base-TX RJ-45 to 10Base-FL or 100Base-FX 1310nm SM SC 20km
SSEFE1014-100	Point System Stand-alone Converter, 10Base-T or 1000Base-TX RJ-45 to 10Base-FL or 100Base-FX 1310nm SM SC 20km

### **Alternative Product**

While a direct replacement product will not be offered, alternative product options can be found the C2110, E-TBT-FRL-05, or E-100BTX-FX-05 series of media converters.

This End-of-life notice supersedes the previous end-of-life notice which announced the discontinuation of the Point System product family, including the SEFE series. The rest of the active Point System products will continue to be available through the end of 2017, as previously announced in January of 2016.

### **Last Order Date**

Orders will be accepted for the discontinued product through October 31, 2017 or while supplies last.

### **Closing**

We look forward to new opportunities to support your networking requirements with our comprehensive product line. Should you have any questions, please contact your sales representative.

Sincerely,  
Transition Networks Management Team
