

Product Discontinuation Notice

September 14, 2017

Dear Valued Customer / Partner:

Transition Networks would like to inform you of our plans to discontinue the SETF product series within the Point System product line. This product is a 10/100 copper to fiber media converter that supports the 10/100Base-SX standard, providing 10/100 auto-negotiation on fiber. A direct replacement product will not be offered, however alternative 10/100 product can be found in the ION Platform. Below is a list of the discontinued product model numbers and their descriptions.

<u>Discontinued P/N</u>	<u>Description:</u>
CSETF1011-205	Point System Card, 10/100Base-TX RJ-45 to 10/100Base-SX 850nm MM ST 300m
CSETF1013-205	Point System Card, 10/100Base-TX RJ-45 to 10/100Base-SX 850nm MM SC 300m
SSETF1011-205	Point System Stand-alone, 10/100Base-TX RJ-45 to 10/100Base-SX 850nm MM ST 300m
SSETF1013-205	Point System Stand-alone, 10/100Base-TX RJ-45 to 10/100Base-SX 850nm MM SC 300m

Alternative Product

While a direct replacement product is not available, alternative products can be found SBFTF and C2210 series of media converters. These alternatives support 10/100Base-TX to 100Base-FX with 1300nm wavelength and offer much longer transmission distances.

This End-of-life notice supersedes the previous end-of-life notice which announced the discontinuation of the Point System product family, including the SETF series. The rest of the active Point System products will continue to be available through the end of 2017, as previously announced in January of 2016.

Last Order Date

Orders will be accepted for the discontinued product through November 30, 2017 or while supplies last.

Closing

We look forward to new opportunities to support your networking requirements with our comprehensive product line. Should you have any questions, please contact your sales representative.

Sincerely,
Transition Networks Management Team
