

## Product End-of-Life Notice

November 8, 2017

Dear Valued Customer / Partner:

Transition Networks would like to inform you of our plans to discontinue the CPSFM-200 fan module. This module is used for additional cooling in the 18 or 19-slot Point System chassis, when only a single power supply is being used. The discontinuation is due to component availability issues and the planned End of Life of the Point System chassis products, as previously announced on January 25, 2016.

Discontinued Product:

<b>Model</b>	<b>Description</b>
CPSFM-200	Chassis Backplane Fan Module for the Point System 18 and 19-slot chassis

Replacement Product:

Transition Networks will not be offering a direct replacement, however an alternative product can be found in the CPSMP-205 redundant AC power supply. This power supply can be used to provide the additional cooling offered in the CPSFM-200.

Additionally, the ION Platform has replaced the Point System and offers options to meet all your chassis based media conversion needs. Including new power supply module designs that are more energy efficient, generate less heat, and require less cooling.

Last Order Date:

Orders will be accepted for the discontinued product through November 30<sup>th</sup>, or while supplies last.

Closing:

We look forward to new opportunities to support your networking requirements with our comprehensive product line. Should you have any questions, please contact your sales representative.

Sincerely,

Transition Networks Management Team
