## Product Discontinuation Notice

January 14, 2021

Dear Valued Customer / Partner:

Transition Networks would like to inform you of our plans to discontinue a couple specific versions of our T1/E1 copper to fiber network interface devices (NID) within our C6010 and S6010 product families. Listed below are the discontinued part numbers along with their descriptions.

**Discontinued P/N**

C6010-3040  
S6010-3040

**Description:**

ION slide-in-card NID module, Dual Coax BNC to open SFM Slot  
ION stand-alone NID, Dual Coax BNC to open SFM Slot

**Last Order Date**

Orders will be accepted for the discontinued product through March 31, 2021, or while supplies last.

**Replacement Product:**

A direct replacement product will not be offered. However the x6010-1040 offers similar functionality while supporting an RJ-45 for twisted pair connectivity, rather than the Dual BNC connector for Coax cable found in the x6010-3040.

**Closing**

We look forward to new opportunities to support your networking requirements with our comprehensive product line. Should you have any questions, please contact your sales representative.

Sincerely,

Transition Networks Management Team
