Product Discontinuation Announcement

Dear Valued Lantronix Customer,

The purpose of this communication is to inform you that Lantronix is discontinuing the 200.2225 RJ45F/RJ45RF adapter.

The deadline for placing final non-cancelable, non-returnable purchase orders is **February 29, 2008*** and shipments must be scheduled no later than **April 30, 2008***, with ***availability subject to supplies on hand.**

The last day of support for this product is **July 31, 2008.**

Discontinued Part Number

Part No.	Description
200.2225	ADAPTER, NETRA LTRX RJ45F/RJ45RF

The replacement for the 200.2225 adapter is the ADP010104-01 rolled serial adapter. With an integrated RJ45 cable, the ADP010104-01 rolled serial adapter eliminates the need for an additional Cat5 patch cable between the adapter and the connected equipment.

For use with most Lantronix console servers including the SLC, the ADP010104-01 provides a quick and convenient means of connecting with Cisco, Sun, and other equipment featuring RJ45-type console (RS-232) ports.

In most applications, the ADP010104-01 is plugged into the console port of the managed device and standard Cat5 cabling is used to connect to the Lantronix terminal server or console server.

ADP010104-01 highlights:

- Use with standard Cat5 cable
- Supports most Cisco and Sun equipment with an RJ45 connection
