WiPort® PRODUCT CHANGE NOTICE

Dear Valued Lantronix Customer,

Lantronix has started shipping a new revision (“C”) of the DSTni EX processor used in the WiPort products. In addition, there will be an additional future change that will result in a pull-up resistor connected to the processor.

The purpose of these changes is as follows:

- Support for additional manufacturers and types of SPI flash use. This capability is relevant to Lantronix XPort family of products and does not directly affect WiPort operation.
- Improved performance at -40C

There is no form, fit, or function change to the WiPort. These changes do not have any effect on the firmware loaded into the WiPort or the functionality of that firmware.

For quality and tracking purposes, the manufacturing revision numbers on the product label will be changed. New revision numbers are listed in the table.

WiPort Part Numbers affected:

WiPort Part Numbers	Description	Current Revision	New Revision
WP2001000G-02	Standard WiPort b/g bulk	H12	H13 or higher
WP2002000G-02	Standard WiPort b/g bulk AES Encryption	C11	C12 or higher
WP200200SG-02	Standard WiPort b/g Sample Unit	H13	H14 or higher
WP5001000-01	Standard WiPort NR bulk	B11	B12 or higher
WP500100S-01	Standard WiPort NR Sample Unit	B11	B12 or higher

SCHEDULE: The revised products will begin shipping approximately February 28, 2008.

PRICING: The pricing for all WiPort products will remain the same as your current pricing.

If you have any questions, please contact your sales representative or Lantronix Customer Support at (866) 649-0721 or (949) 453-3990 x342.
