## Product Discontinuation Announcement

Dear Valued Lantronix Customer,

The purpose of this communication is to inform you that Lantronix is discontinuing our XPress-I/O industrial device server product.

The deadline for placing final non-cancelable, non-returnable purchase orders is **April 30, 2008,\*** and shipments must be scheduled no later than **July 31, 2008,\* with \*availability subject to supply on hand.** The last day of support for this product is **July 30, 2010.**

The replacement for the XPress-I/O product is the IntelliBox®-I/O industrial device server. Powered by Lantronix EventTrak™ technology, this highly-advanced, programmable device server connects your equipment to an IP network and monitors it to watch for events at specified intervals.

When an event occurs, IntelliBox automatically sends pre-determined, user-defined command(s) to the equipment causing it to take appropriate and/or corrective actions – without any user intervention. IntelliBox can send email notification that the event was detected and handled accordingly.

### IntelliBox features:

- Remotely monitor and control RS232 or RS422/485-based equipment
- Remote I/O management using common SCADA or OPC servers with Modbus/TCP protocol
- Modbus TCP to Modbus RTU/ASCII gateway
- SSH/SSL enterprise-grade network security
- Secure remote access and control of digital I/O and relays
- 10/100 Ethernet interface with 1.5kv isolation (802.3 standard)
- Two serial ports (RS232 and RS422/485) with ESD protection and 1.5kv isolation from incoming power
- Two optically-isolated digital I/O

### Transition Table:

Existing Part Number	Replacement Part Number	Availability
XSIO21000-01	IBIO21002-01	Now shipping
