Description and Extent of Change

Due to EOL of critical components, the following HW changes are implemented:

- Qualcomm WiFi/BT RF Front End Modules replaced by Qorvo
- Samsung LPDDR5 RAM replaced by SK Hynix
- Micron UFS 64GB replaced by Samsung

The new components have been tested and qualified by Lantronix to meet the requirements of the original SOM.

Effect of Change on Fit, Form, or Function

Due to the change of WiFi/BT RF Front End Modules, Lantronix is required to obtain a new FCCID and regulatory certifications. The new certification will be applicable on new P/N using the new components. Customers using the new P/N will also need to obtain their own certification if they intent to use WiFi/BT in the end product. Customers can leverage module's certification to simplify the process. We encourage you to contact Lantronix Sales for assistance in this topic.

Effective Date of Change

The "Replacement Part Numbers" are available to be ordered starting September 1, 2025.

The "Discontinued Part Numbers" are available to be ordered through December 31, 2025, subject to availability.
