Description and Extent of Change

Lantronix is pleased to announce the release of new and improved NTC-22x series firmware version v2.3.0.0R14. The release includes new features and bug fixes including:

New features:

- Add Perception Support in the NTC-22x series.
- Add an OpenVPN client port option to web UI.
- Destination IP address field for inbound rule added.
- Option to revoke OpenVPN certificate.
- Return Subscriber Number through CLI.

Bug fixes:

- Branding and web user interface related changes.
- Firmware update fix via TR-069.
- Firmware upgrade logic improvements.
- Security enhancements related to EN18031 compliance requirements.
- Integration of existing IPK: ntc227-lte-band-fix_1.1_arm-signed.

For customers that would like to take advantage of the new capabilities of firmware version v2.3.0.0R14, the new firmware available for download from our website: <http://www.lantronix.com/support/downloads>.
