PRODUCT CHANGE NOTICE

Dear Valued Lantronix Customer,

Lantronix is pleased to announce the launch of the updated and improved version 6.7 firmware. Version 6.7 will begin shipping on the wireless products listed in the table below. This new firmware offers several new enhancements, including:

Configuration

- Expanded configuration options to ease wireless deployment. This includes the ability to configure the maximum number of WLAN packet transmission failures for the 'MaxTxFail' event, as well as configure the minimum WLAN data transmission speed (for auto-fallback).

Radio Firmware

- Updated radio firmware to enhance operation and stability.

Diagnostics

- The Network Status command has been enhanced to provide additional wireless status information.

For a complete listing, please refer to the firmware release notes.

For quality and tracking purposes, the manufacturing revision numbers on the product label will be changed. New revision numbers are also listed in the table.
