PRODUCT CHANGE NOTICE

ManageLinx DSM/DSC

Dear Valued Lantronix Customer,

Lantronix is pleased to announce the launch of the updated and improved version 3.0 DSM/DSC firmware. Effective October 1, 2010, firmware 3.0 will begin shipping on the DSM and DSC. This new firmware version offers several new features, including:

New and Improved User Interface – Sleek new user interface built for ease of administration

SNMP – System now reports conduit status to NMS (network management system)

DSC WAN and LAN ports active – WAN and LAN ports active. WAN port for DMZ connection and LAN port used as secure local connection

Host Controller functionality on DSM – If DSM resides behind a firewall, it can now support host controller functionality. VIPs can be created and hosted by the DSM, thereby eliminating requirement for separate DSC box.

Connect on Demand DSC – DSC now has an option to connect on demand. Connect on demand based on timer interval and/or when remote device needs to deliver data.

AES256bit Encryption – Option to enable AES256bit levels of encryption for DSC.

Authorization Server DSC – DSC now has option to be an authorization server. Devices that are added remotely are only granted access if the remote administrator allows the connection.

Access Control Filters – This feature may be used to only allow certain ports such as secure only 443 connections.

Part Number	Description	Current Revision	New Revision with Firmware V3.0
DSM200002-01	ManageLinx DSM (Device Services Manager)	D15	E16
DSC2204P2-01	ManageLinx DSC (Device Services Controller)	D15	E16
