PRODUCT CHANGE NOTICE

Dear Valued Lantronix Customer,

Lantronix is pleased to announce the release of new application firmware version **7.8.0.0R20** for PremierWave® XC HSPA+. The new firmware, now available at the Lantronix website, offers several new features and improvements, including:

- Dynamic DNS Support – Access product via hostname even if IP address on cellular link changes
- uPnP Discovery – Easy access to product configuration without knowledge of network configuration
- Network Traffic Control (QOS) – Configurable traffic prioritization and bandwidth allocation
- MAC Address Filtering – Prevent unauthorized LAN devices from communicating through gateway
- SNTP Support – Keeps product time up-to-date via external NTP servers
- SNMPv3 Support – Advanced security and authentication for SNMP access
- Port Forwarding Enhancements – Configure any combination of IP address/port for source and destination
- SMTP Authentication – Communicate with SMTP servers requiring authentication for sending email

Part Number(s)	Product Description	Current Revision	New Revision with Firmware 7.8.0.0R20
PXC2102H2-01-S	PremierWave XC HSPA+ Intelligent Gateway, Industrial Temperature, Universal Power Supply with Regional Adapters, RoHS	A11	B11
