PXN210002-01U	Premierwave XN Wireless Intelligent Gateway, 802.11a/b/g/n, Universal Power Supply with Regional Adapters, RoHS – US version	B13	C13

Description and Extent of Change

Lantronix is pleased to announce the release of PremierWave XN Application Firmware version 8.0.0.0R19. This new firmware offers several new features and improvements including:

- Unique Device Identification (UDID) support
- IPv6 support for FTP and SSH
- WebAPI support
- Configuration for additional TCP keep alive parameters

Refer to the release notes for a complete list of additional features.

For customers that would like to take advantage of the new capabilities immediately, the new firmware, associated release notes and upgrade instructions is available for download from our website, <http://www.lantronix.com/support/downloads>.

Other Changes Included with the New Revision

In addition to the firmware change described above, the affected products underwent a power supply change. The power supply that ships with the product was changed from one with a Power Efficiency Level V rating to an equivalent power supply with a Power Efficiency Level VI rating.

Effect of Change on Fit, Form, or Function

Functional changes as noted above.

Effective Date of Change

The affected products with the above changes will begin shipping from the factory by January 31, 2017.

If you have any questions, please contact your sales representative or Lantronix Technical Support at (800) 422-7044 or (949) 453-7198.
