Description and Extent of Change

Lantronix is pleased to announce the release of PremierWave XC Application Firmware version 8.0.0.0. This new firmware offers several new features and improvements including:

- Unique Device Identification (UDID) support
- IPv6 support for FTP and SSH
- WebAPI support
- Configuration for additional TCP keep alive parameters

Additionally, Lantronix is releasing Cellular Modem Firmware version 03.001 [01.001.24], which includes stability fixes that would improve the connectivity of the cellular interface. It is recommended that the Cellular Modem Firmware be updated **AFTER** upgrading your device to PW XC HSPA+ Application Firmware version 8.0.0.0.

For customers that would like to take advantage of the new capabilities, the new firmware, associated release notes, and upgrade instructions will be available for download from our website on February 17, 2017:

<http://www.lantronix.com/support/downloads>.

Other Changes Included with the New Revision

In addition to the firmware change described above, P/N PXC2102H2-01-S underwent a power supply change. The power supply that ships with the product was changed from one with a Power Efficiency Level V rating to an equivalent power supply with a Power Efficiency Level VI rating.

Effect of Change on Fit, Form, or Function

Functional changes as noted above.

Effective Date of Change

The affected products with the above changes will begin shipping from the factory by March 23, 2017.

If you have any questions, please contact your sales representative or Lantronix Technical Support at (800) 422-7044 or (949) 453-7198.
