Lantronix is pleased to announce the release of new and improved SLB firmware 6.6.0.0.

### **Description and Extent of Change**

The release includes new features and bug fixes including:

- Support for ConsoleFlow, our Centralized Management Software for Console Managers
- Support for LTE Cellular Connectivity Kit

### **Reason for Change**

New features and expanded capabilities

For SLB customers who would like to take advantage of the above new capabilities, the firmware and associated release notes are now available for download from our website:

<https://www.lantronix.com/products/lantronix-slb/#docs-downloads>

More information about SLB Branch Office Manager is available on our website:

<https://www.lantronix.com/products/lantronix-slb>

**Effect of Change on Fit, Form, or Function**

Functional changes only as noted above.

**Updating your SLB**

If you have procured previous revisions of the affected products or are running older version of firmware on your deployed SLB, we highly recommend that you upgrade to the newest version 6.6.0.0 using the firmware upgrade procedures outlined in the user guide or via centralized management software such as vSLM and ConsoleFlow.

If you have any questions, please contact your sales representative or Lantronix Technical Support at (800) 422-7044 or (949) 453-7198.
