

PRODUCT DISCONTINUATION NOTICE

Dear Valued Lantronix Customer,

The purpose of this communication is to inform you that Lantronix is announcing the end-of-sale and end-of-life of the Open-Q 605 SBC and associated accessories, effective immediately. This change is part of our effort and commitment to continuous improvement of our products and processes.

We have found that most of our clients need a customized solution because our standard Open-Q 605 SBC did not meet their specific requirements. Therefore, we have decided to discontinue the 605 SBC as a standard product and focus our resources on our SOM + Carrier Board solutions, which generally provide a much better custom solution for our clients. Lantronix has a wide range of Qualcomm based production-ready SOMs to base a custom design on and can also provide expert HW engineering services to help you get your new product designed and to market. If a single board computer solution fits your needs better, we will still support and sell custom SBC or SOM solutions based on the QCS605 and our engineering services group can provide a design to meet your exact requirements.

Contact your account manager to set up a meeting with one of our solutions architects, or to get your questions answered.

Change Type: End of Life
