Description and Extent of Change

Lantronix is pleased to announce the release of new and improved G526GP series firmware version 2.4.0.0R19. The release includes new features and bug fixes including:

NEW FEATURES:

- SSH access on first boot/factory reset requires changing user password similar to Web GUI.
- Update OpenSSL version to 3.0.9 which brings in TLS 1.3 support, bug and CVE fixes.
- Web connect allows access to the device Web GUI from PercepXion platform.
- Add support for 4G4XLAT protocol to provide connectivity if the cellular uplink is IPv6 only.
- Add support to manually edit the SIM configuration files.
- Add support to select/unselect bands for faster cellular connectivity.
- System software and updates are now available on update.lantronix.com instead of updates.d2sphere.com.

Refer to the release notes for a complete list of features and bug fixes.

For customers that would like to take advantage of the new capabilities of firmware version 2.4.0.0R19, the new firmware available for download from our website: <http://www.lantronix.com/support/downloads>.

Reason for Change

New Firmware release

Effect of Change on Fit, Form, Function

Functional changes as noted on release notes.

Effective Date of Change

This change will go into effect for the listed products built from **January 31, 2025** onwards.

If you have any questions, please contact your sales representative or contact Lantronix Technical Support by submitting a ticket to: <https://ltxdev.atlassian.net/wiki/spaces/LTRXTS/overview>
