### 5.6.7 SNAP CAP™ RS-485

SNAP CAP™ RS-485 connects to the E210 series router's RS-232 port and converts it to half-duplex or full-duplex RS-485 port. The duplex setting is configured by a switch on the side of the SNAP CAP RS-485. The port parameters are configured in the software (ePack).

Please consult the *SNAP CAP™ RS-485 Datasheet* for more details.
