

IONPS-x Release Notes

Date: April 27, 2012

Version: 1.2.2

Overview

This release note covers the requirements, important notes, new features and changes, addressed issues, and known limitations for the IONPS-x power supply.

Management of the ION219-x and IONPS-x requires the use of an IONMM management module installed in the ION219-x chassis. Management information is available using a web browser or via Command Line Interface (CLI) via the local USB port or telnet of the IONMM.

Requirements:

Firmware version 1.2.2 and these release notes apply to the following products:

- IONPS-A
- IONPS-D

New Features and Enhancements:

The following list is new features and enhancements for version 1.2.2 of the IONPS-x products.

- Traps will now be sent to the trap server when each individual power supply in the ION chassis has lost power, rather than one trap being sent only after both power supplies lose power.
