Qualcomm® Snapdragon™ 888 Mobile Hardware Development Kit

Comprehensive and expandable development and evaluation kit for the Snapdragon 888 Mobile Platform.

The Snapdragon 888 Mobile Hardware Development Kit provides an open-frame solution for technology companies to integrate and innovate devices based on the Snapdragon 888 Mobile Platform.

The Snapdragon 888 Mobile Hardware Development Kit is a feature-rich Android development platform that is designed to provide an ideal starting point for creating high-performance mobile devices and applications based on the Snapdragon 888 Mobile Platform. The kit includes the hardware, software tools and accessories needed to immediately begin your mobile development work.

With an advanced 5-nanometer design, Snapdragon 888 platform is engineered for innovative and intelligent on-device AI, gigapixel speed professional camera quality, desktop quality graphics, and Gigabit Class download speeds.

The Snapdragon 888 mobile development platform is designed to provide original equipment manufacturers (OEMs), hardware/software vendors, developers and engineers with next generation software technology and tools to accelerate development and testing of devices.

Solution Highlights

Kit Contents

- Single board computer (SBC) with Snapdragon 888
- 12V AC power adapter
- USB cable
- Setup guide

Display Expansion Card is an additional accessory
